

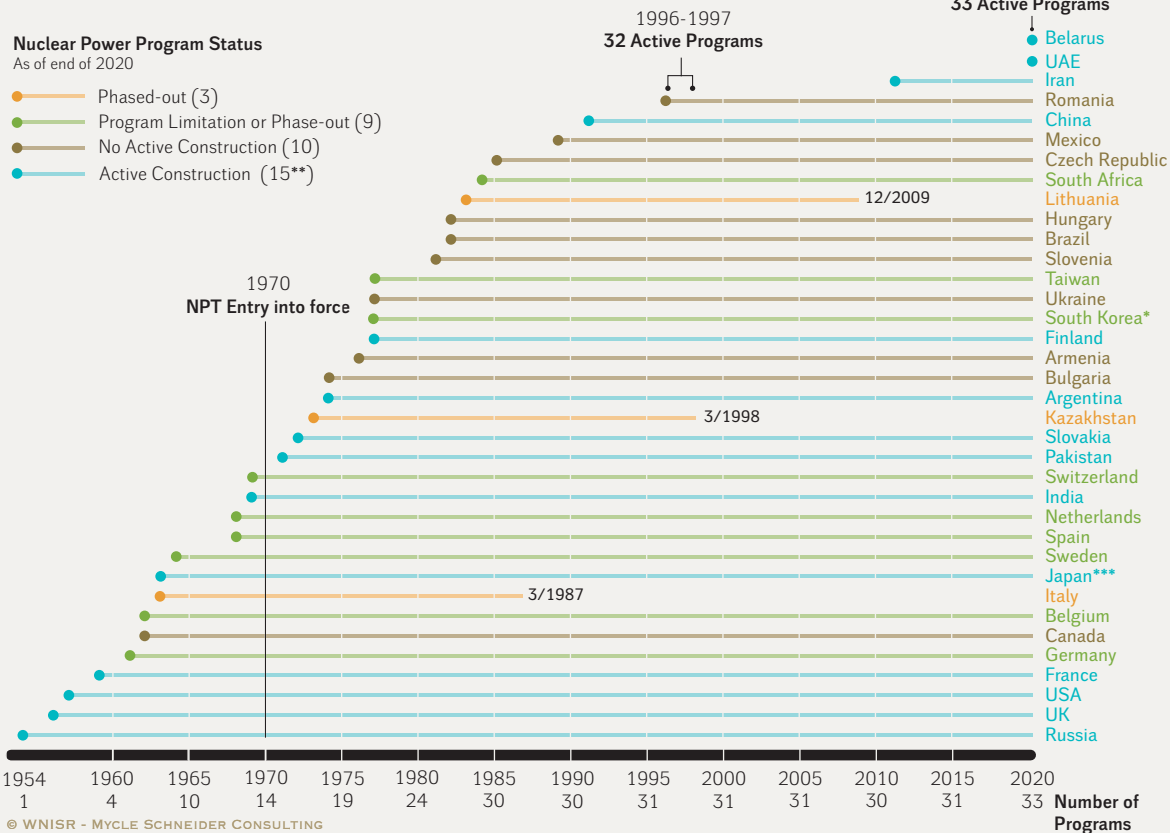

Figure 2 · History of National Nuclear Power Programs

National Nuclear Power Program Startup and Phase-out

Cumulated Number of National Programs, as of Year-End, 1954–2020

Source: WNISR, with IAEA-PRIS, 2021

Notes

This figure only displays countries with operating or once operating reactors.

* Although it has a phaseout policy, South Korea has four reactors under construction as of 1 July 2021.

** Including South Korea listed in the category “Program Limitation or Phase-out”.

*** Japan is counted here among countries with “active construction”—however it is possible that the only project under active construction (Shimane-3) will be abandoned.
