

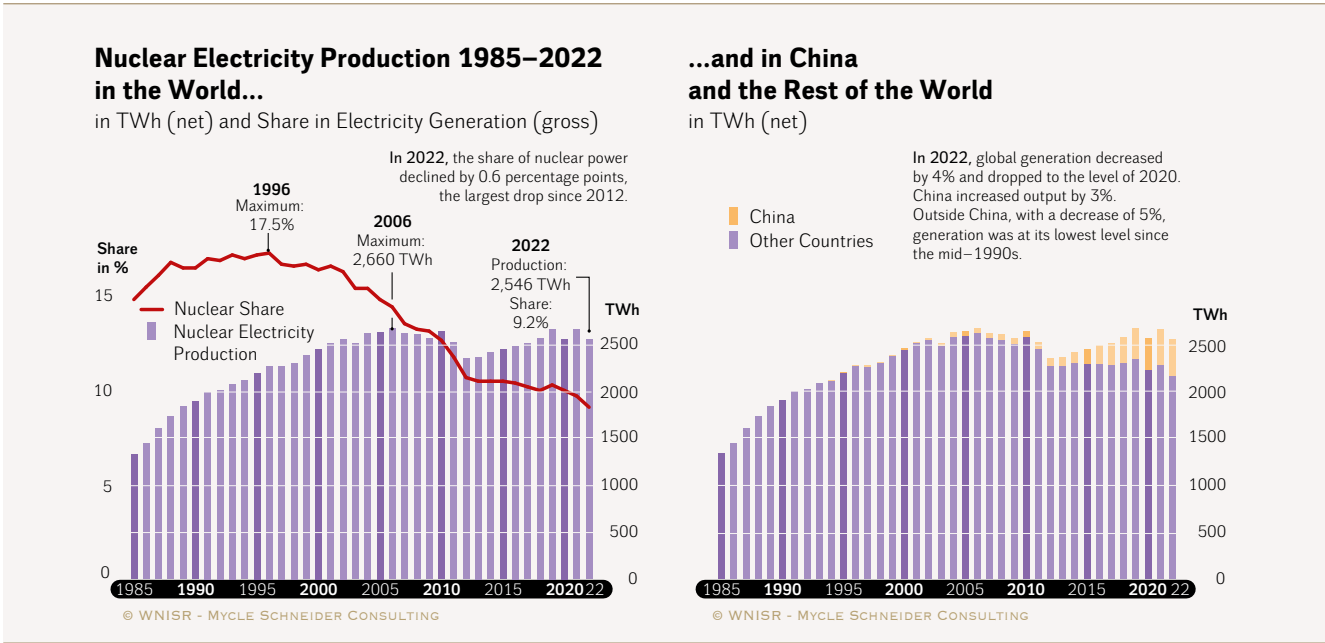

Figure 2 • Nuclear Electricity Generation in the World... and China

Sources: WNISR, with IAEA-PRIS and Energy Institute, 2023

Note: IAEA-PRIS production data for the year 2022 does not include Ukraine (data unavailable). Net nuclear production for Ukraine for the year 2022 represented 59 TWh according to the Energy Institute’s “Statistical Review of World Energy” dataset.<sup>21</sup> The total number is thus based on IAEA-PRIS plus the production figure for Ukraine from the Energy Institute.
