

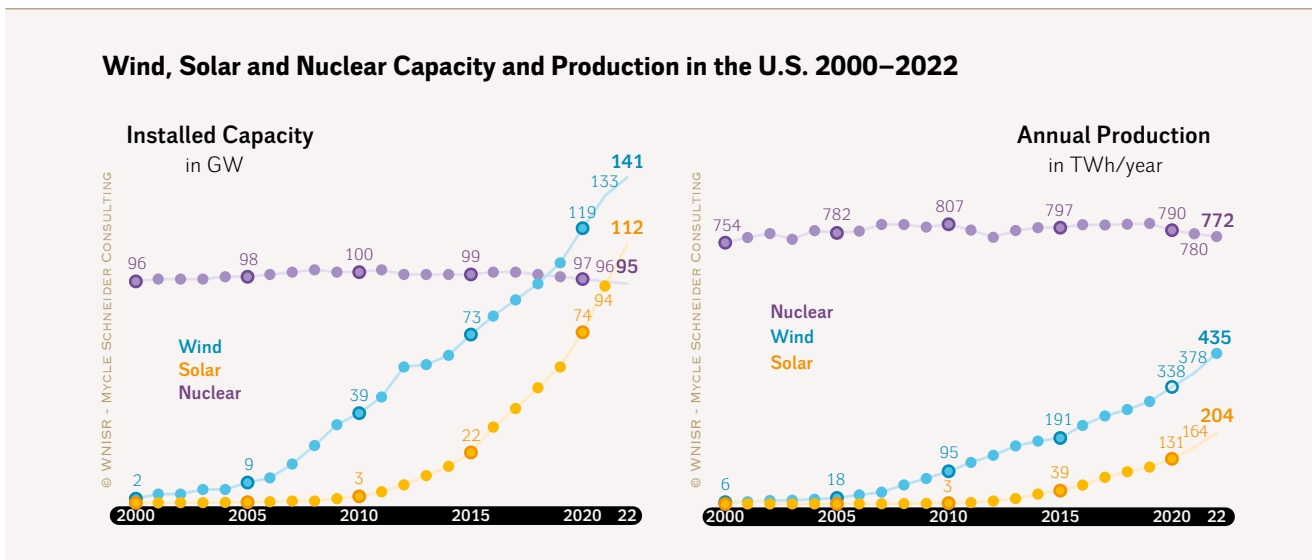

Figure 73 • Wind, Solar and Nuclear Installed Capacity and Electricity Production in the United States

Sources: WNISR with IAEA-PRIS, IRENA, Energy Institute, 2023

Note pertaining to Figure 65 to Figure 73 (except Figure 70):

Unless otherwise indicated, production data for renewables and nuclear are in net TWh from Energy Institute “Statistical Review of World Energy 2023 – Consolidated Dataset”; gross production numbers from Energy Institute are used for comparisons with fossil fuels (for which net data are not available).¹⁸¹⁶

Numbers for installed capacity for renewables are from IRENA¹⁸¹⁷, and for nuclear capacity compiled by WNISR, based on IAEA-PRIS.

¹⁸¹⁶ - Energy Institute “Statistical Review of World Energy 2023 – Consolidated Dataset”, see <https://www.energyinst.org/statistical-review/resources-and-data-downloads>; gross production numbers from Energy Institute are used for comparisons with fossil fuels (for which net data are not available).
