

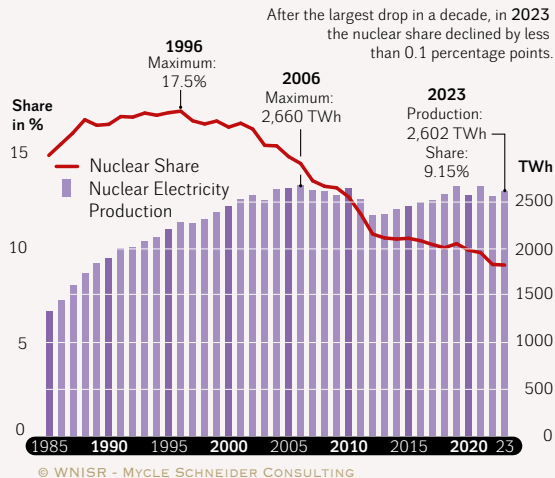

Figure 2 • Nuclear Electricity Generation in the World... and China

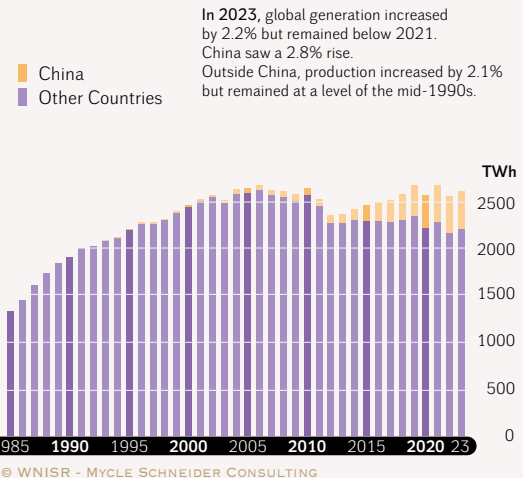

Nuclear Electricity Production 1985–2023 in the World...

in TWh (net) and Share in Electricity Generation (gross)

...and in China and the Rest of the World

in TWh (net)

Sources: WNISR, with IAEA-PRIS and Energy Institute, 2024

Note: IAEA-PRIS production data for the years 2022 and 2023 does not include Ukraine (data unavailable). Net nuclear production for Ukraine for those years represented 59 TWh and 49 TWh respectively according to the Energy Institute’s “Statistical Review of World Energy” dataset.²⁴ The total number is thus based on IAEA-PRIS plus the production figure for Ukraine from the Energy Institute.
