Overview of Completed Reactor Decommissioning Projects, 1954–2024

in the U.S., Germany, Japan and Spain, as of 1 July 2024

Sources: Various, compiled by WNISR, 2024

Note: As of WNISR2024, the “Released” category only contains “greenfield released” reactors, whereas it also contained “brownfield released” reactors in previous editions (see definitions in the introduction of the chapter). The LaCrosse and Shoreham reactors had in previous WNISR editions been classified as “greenfield released”. However, the site at LaCrosse still contains an interim spent-fuel storage facility and is thus reclassified as a brownfield site, and while the Shoreham reactor was released from regulatory oversight, it was never dismantled and most buildings have remained intact.
