

Figure 14 · Cancelled or Suspended Reactor Constructions

**Abandoned and Suspended Reactor Constructions from 1970 to 1 July 2026**

in Units by Cancellation Year and Country

Sources: Various, compiled by WNISR, 2026

**Notes**

The shaded colors indicate the first suspension in the case of reactors where construction was suspended several times (e.g. Brazil and Japan).

This figure only includes constructions that had officially started with the concreting of the base slab of the reactor building. Many more projects have been cancelled at earlier stages of construction/site preparation and equipment manufacturing.
